

FOURTH ANNUAL CEO ROUND TABLE

The Transatlantic Corporation in the Global Economy

8 & 9 July 2004, Paris, France

On 8 & 9 July 2004, **CERT** will hold its fourth annual CEO Round Table in Paris, France in partnership with Gide, Loyrette, Nouel LLP and the European Aeronautic Defence & Space Company (EADS). The event will focus on the theme “*The Transatlantic Corporation in the Global Economy*” and offer an opportunity for high-level discussion of current issues and possible solutions.

This meeting comes at a critical juncture in transatlantic relationships and will feature leading CEOs, business executives and political decision-makers from the Canada and the European Union.

This year’s CEO Round Table will address the transatlantic sphere’s role as a motor of the global economy, including discussion of corporate trends in trade and investment. Further to this will be an examination of whether we are witnessing a deepening of transatlantic economic relations, or rather the development of economic ‘poles’ in North America, Europe, and Asia.

The Canada-EU relationship is characterized by high levels of bilateral investment. CERT is taking the initiative to develop principles that, once incorporated by government, will lead to a more unified transatlantic market.

The key outcomes from the CEO Round Table will be submitted to leaders in the European Commission and Government of Canada in support of negotiations on the Canada-EU Trade and Investment Enhancement Agreement (TIEA).

For further information and a current version of the programme, contact info@canada-europe.be
